

**Fourth National Conference
on
I. C. Engines and Combustion**

December 9-11, 1977

MADRAS, INDIA

Proceedings
Volume I

Sponsored by :

College of Engineering, Guindy, Madras.
Department of Science and Technology, Govt. of India.
Ministry of Defence, Govt. of India.
Council of Scientific and Industrial Research, Govt. of India.
The Institute of Road Transport, Madras.
Madras Institute of Technology, Madras.
Petroleum Conservation Action Group, New Delhi.
The Institution of Engineers (India), Tamil Nadu Centre.
The Institution of Automobile Engineers (India), Madras.
The Combustion Institute, Indian Section.
The Society of Mechanical Engineers of the College of Engineering, Guindy,
Madras.

CONTENTS

Volume I

INVITED TALKS

- | | |
|---|-------|
| 1. Heavy Duty Diesel Truck Fuel Economy Research
<i>P. S. Myers</i> | 1-16 |
| 2. A Real Time Measurement of Some Turbulence Parameters in a
Motored I.C. Engine
<i>J. C. Dent</i> | 17-28 |

ENGINE-ANALYTICAL MODELLING TECHNIQUES

- | | |
|---|----------|
| 1. An Introduction to the Concept of Digital Simulation of a
Diesel Cycle
<i>K. N. Gopalan and B. S. Murthy</i> | E 1 1-7 |
| 2. Simulation of V.C.R. Engine on Digital Computer
<i>N. S. Nagaratnam and P. M. Menon</i> | E 1 8-17 |

- | | |
|---|-----------|
| 3. An Analytical Study of U-Cylinder Crankcase Scavenged
Two-Stroke Diesel Engines
<i>M. R. Raghavan and K. Narayanaswamy</i> | E 1 18-39 |
|---|-----------|

- | | |
|--|-----------|
| 4. Substantiation of a Theoretical Model for the NO _x Formation
into the Cylinder of S.I. Engines
<i>V. A. Zvonow</i> | E 1 40-51 |
|--|-----------|

- | | |
|--|-----------|
| 5. A Mathematical Model to Predict Exhaust Nitric Oxide
Concentration of a Compression Ignition Engine
<i>B. Haragopala Rao and V. Singh</i> | E 1 52-60 |
|--|-----------|

- | | |
|---|-----------|
| 6. Prediction of Noise of an Engine Exhaust System
<i>M. L. Kathuriya and M. L. Munjal</i> | E 1 61-70 |
|---|-----------|

- | | |
|---|-----------|
| 7. Some Studies on the Performance of a Single Cylinder Four-
Stroke Diesel Engine with Low Pressure Supercharger
<i>A. Krishnappa, B. S. Samaga and K. Mahadevan</i> | E 1 71-81 |
|---|-----------|

- | | |
|--|-----------|
| 8. Computer Calculation of the Effect of Dissociation on the
Performance of Diesel Engines
<i>N. Baluswamy</i> | E 1 82-95 |
|--|-----------|

i

ENGINE-FUELS AND ADDITIVES

- | | |
|--|---------|
| Gasol-Gasoline Blends for Automobiles
<i>Pundir, K. K. Gandhi and Harbans Singh</i> | E 2 1-9 |
|--|---------|

- | | |
|---|-----------|
| Gasol Blended Gasoline as Modern Motor Fuel
<i>Mathur and R. K. Bakshi</i> | E 2 10-19 |
|---|-----------|

- | | |
|--|-----------|
| Tests on the Performance of Hydrogen as a S.I.
Engine Fuel
<i>Prakash, K. V. Gopalakrishnan and B. S. Murthy</i> | E 2 20-26 |
|--|-----------|

- | | |
|--|-----------|
| Liquefied Petroleum Gas (LPG) as an Engine Fuel
<i>Nijaguna and G. P. Prabhukumar</i> | E 2 27-34 |
|--|-----------|

- | | |
|--|-----------|
| Based Benzole as S.I. Engine Fuel
<i>Mathur and M. R. Madan</i> | E 2 35-45 |
|--|-----------|

- | | |
|--|-----------|
| Investigations into the Use of Gobar Gas in I.C. Engines
<i>Kothandaraman</i> | E 2 44-50 |
|--|-----------|

- | | |
|--|-----------|
| Combustion Characteristics of Gobar Gas in a Gobar Gas
Oil Dual Fuel Engine
<i>Viswanathan, N. R. Panchapakesan,
Gopalakrishnan and B. S. Murthy</i> | E 2 51-60 |
|--|-----------|

- | | |
|--|-----------|
| Effect of Additives to Alcohol on the Performance of an
Alcohol-Diesel Oil Dual Fuel Engine | E 2 61-71 |
|--|-----------|

- | | |
|---|-----------|
| 5. Fabrication and Testing of Apparatus for Finding Some Spray
Characteristics of Engine Injection
<i>S. B. L. Beohar and R. C. Agrawal</i> | E 3 15-20 |
|---|-----------|

- | | |
|--|-----------|
| 4. Design and Development of a Gas Carburettor and Some
Experimental Analysis on a Multicylinder Spark Ignition Engine
<i>P. K. Roy, P. Banerjee and B. B. Ghosh</i> | E 3 21-30 |
|--|-----------|

- | | |
|--|-----------|
| 5. Design and Development of a U-Cylinder Crankcase
Scavenged Experimental Unit
<i>M. R. Raghavan and K. Narayanaswamy</i> | E 3 31-39 |
|--|-----------|

- | | |
|---|-----------|
| 6. Development of a High Specific Output Diesel Engine for
Fighting Vehicles
<i>P. M. Menon</i> | E 3 41-49 |
|---|-----------|

- | | |
|---|-----------|
| 7. A Study of the Problems Experienced by the Top Ring and Top
Groove in Piston Assemblies of High Speed Diesel Engines
<i>V. Chandrasekaran, R. Mahadevan and V. A. Parameswaran</i> | E 3 51-63 |
|---|-----------|

- | | |
|--|-----------|
| 8. Prediction and Control of Fuel Injection Rate in Diesel Engines
<i>J. K. Sharma and R. D. Garg</i> | E 3 65-72 |
|--|-----------|

ENGINE—EXHAUST EMISSION AND CONTROL—I

- | | |
|---|---------|
| 1. Equilibrium Considerations to Study the Effect of Dilution in
Combustion Systems
<i>P. S. Mehta, C. P. Gupta and B. Haragopala Rao</i> | E 4 1-8 |
|---|---------|

- | | |
|---|----------|
| 2. Exhaust Emissions of an Automobile Engine During Cold-Start
and Warmup
<i>J. P. Subrahmanyam and R. P. Henry</i> | E 4 9-16 |
|---|----------|

- | | |
|--|-----------|
| 3. Engine Testing of a Catalytic Converter to Reduce HC/CO in
Automobile Exhaust
<i>B. Nagalingam, K. V. Gopalakrishnan and B. S. Murthy</i> | E 4 17-25 |
|--|-----------|

- | | |
|--|-----------|
| 4. Effect of Lead Content in Gasoline on Performance and
Emission Characteristics of Spark Ignition Engine
<i>N. S. Murthy, V. L. Patel and M. K. Talukdar</i> | E 4 27-35 |
|--|-----------|

iii

- | | |
|---|-----------|
| 5. Hydrogen Supplementation for Spark Ignition Engine Exhaust
Emission Control
<i>H. B. Mathur and B. B. Bansal</i> | E 4 37-45 |
|---|-----------|

- | | |
|---|-----------|
| 6. The Carbon Monoxide as an Exhaust Emission Constituent
from the Four-Stroke Gasoline Engine
<i>G. B. Kyriakopoulos</i> | E 4 47-73 |
|---|-----------|

- | | |
|--|-----------|
| 7. Experimental Investigation on Flame Quenching in an Engine
Combustion Chamber Analogue
<i>M. C. Ramaswamy and M. C. Gupta</i> | E 4 75-87 |
|--|-----------|

ENGINE—EXHAUST EMISSION AND CONTROL—II

- | | |
|--|---------|
| 1. Pollution Performance of an Automotive Diesel Engine
<i>A. S. Subramanian, K. V. Gopalakrishnan and B. S. Murthy</i> | E 5 1-8 |
|--|---------|

- | | |
|--|----------|
| 2. Investigation of Diesel Combustion with Particular Reference to
Gaseous Pollutants Formation by Direct In-Cylinder Sampling
<i>N. Baluswamy</i> | E 5 9-19 |
|--|----------|

- | | |
|---|-----------|
| 3. Investigations of Catalytic Treatment of Diesel Exhaust Gases
<i>Z. T. Zvonova and V. A. Zvonow</i> | E 5 21-29 |
|---|-----------|

- | | |
|---|-----------|
| 4. Combined Effect of Induction Swirl and Anti-Smoke Additive
on Diesel Engine Smoke Emission
<i>P. P. Parikh and B. N. Jaioo</i> | E 5 31-40 |
|---|-----------|

- | | |
|---|-----------|
| 5. An Investigation on the Influence of Combustion Chamber Shape
on the Performance of Anti-Smoke Additive Lubrizol 8005
<i>M. Narayana Rao, C. M. Vara Prasad and N. Sidheswar</i> | E 5 41-51 |
|---|-----------|

- | | |
|---|-----------|
| 6. The Effect of Engine Intake Temperature on the Smoke and
Performance Characteristics of Diesel Engines
<i>H. S. Rama Rao and T. L. Sitharama Rao</i> | E 5 53-61 |
|---|-----------|

Volume II

FLAMES

- | | |
|---|---------|
| 1. A Note on the Zeldovich Frank-Kamenetski Equation for Burning
Rate Eigen Value of Laminar Flames
<i>S. Rajagopalan</i> | C 1 1-5 |
|---|---------|

- | | |
|--|----------|
| 2. Pilot Flames Behind Bluff Bodies in Compressible Flow
<i>K. A. Damodaran and M. C. Gupta</i> | C 1 7-14 |
|--|----------|

- | | |
|--|-----------|
| 3. Temperature Distribution in a Pre-Mixed Flame Surrounded by a
Swirling Stream
<i>G. V. S. N. Rao and V. Sriramulu</i> | C 1 15-24 |
|--|-----------|

- | | |
|--|-----------|
| 4. Investigation on the Methodology of Measuring Burning Velocity
of Enclosed Turbulent Flames
<i>K. S. Padiyar, U. S. P. Shet, C. Narender Nath
and M. C. Gupta</i> | C 1 25-33 |
|--|-----------|

- | | |
|--|-----------|
| 5. Investigations on the Lean Side Stability Limits of Open
Turbulent Flames
<i>U. S. P. Shet, K. S. Padiyar and M. C. Gupta</i> | C 1 35-43 |
|--|-----------|

- | | |
|---|-----------|
| 6. Studies on Unpiloted and Piloted Tubular Burners
<i>U. S. P. Shet, V. Sriramulu and M. C. Gupta</i> | C 1 45-52 |
|---|-----------|

- | | |
|---|-----------|
| 7. A Simple Method of Predicting Flame Holder Residence Times
<i>J. J. Isaac, M. S. Chidananda and K. Sridhara</i> | C 1 53-63 |
|---|-----------|

REACTION KINETICS AND FLOW CHARACTERISTICS

- | | |
|--|----------|
| 1. On the Reaction Mechanism of Methane During the Induction
Period
<i>R. Ravi Kumar and K. A. Bhaskaran</i> | C 2 1-12 |
|--|----------|

- | | |
|--|-----------|
| 2. High Temperature Oxidation of Methanol-An Analytical Study
<i>K. Natarajan and K. A. Bhaskaran</i> | C 2 13-22 |
|--|-----------|

- | | |
|--|-----------|
| 3. Shock Tube Study of High Temperature Ethylene-Oxygen
Reaction
<i>K. A. Bhaskaran and C. Srinivasa</i> | C 2 23-28 |
|--|-----------|

v

- | | |
|--|-----------|
| 4. An Investigation on the Generation of Recirculation Zone by
Confined Swirling Flows
<i>A. V. L. Pathi and C. M. Vara Prasad</i> | C 2 29-40 |
|--|-----------|

- | | |
|--|-----------|
| 5. Influence of Divergent Passages on Swirling Flows in
Combustors
<i>V. M. Domkundwar, V. Sriramulu and M. C. Gupta</i> | C 2 41-49 |
|--|-----------|

- | | |
|--|-----------|
| 6. Prediction of the Hydrodynamic Properties of Enclosed
Swirling Flows
<i>V. Ganesan and B. S. Murthy</i> | C 2 51-60 |
|--|-----------|

- | | |
|--|-----------|
| 7. Velocity and Turbulence Level Measurements in Three
Dimensional Turbulent Flows
<i>A. N. Rao, V. Ganesan, R. Natarajan,
K. V. Gopalakrishnan and B. S. Murthy</i> | C 2 61-69 |
|--|-----------|

- | | |
|---|-----------|
| 8. Characteristics of Discharge Coefficient for Dividing Manifolds
<i>K. B. Shivarudrappa and R. Sakthivadivel</i> | C 2 71-79 |
|---|-----------|

HETEROGENEOUS COMBUSTION

- | | |
|--|----------|
| 1. Experimental Studies on Simulated Droplet Diffusion Flames
<i>A. K. Ghosh and R. Natarajan</i> | C 3 1-10 |
|--|----------|

- | | |
|--|-----------|
| 2. Droplet Combustion
<i>K. M. V. Malarkkan</i> | C 3 11-24 |
|--|-----------|

- | | |
|---|-----------|
| 3. Experimental Investigations on Liquid Fuel Burners Incorporating
Acoustic Atomization
<i>P. Ravishanker, U. S. P. Shet, R. Natarajan and M. C. Gupta</i> | C 3 25-31 |
|---|-----------|

- | | |
|--|-----------|
| 4. Porous Sphere Experiments on Interference Effects in Droplet
Combustion
<i>C. P. Sarathy and R. Natarajan</i> | C 3 33-42 |
|--|-----------|

- | | |
|---|-----------|
| 5. Experiments on the Combustion of Linear Arrays of Fuel
Droplets in Still Air
<i>C. P. Sarathy and R. Natarajan</i> | C 3 43-52 |
|---|-----------|

vi

- | | |
|--|-----------|
| 6. Combustion Systems for Indian Coals
<i>M. Karunakara Reddy</i> | C 3 53-68 |
|--|-----------|

- | | |
|--|-----------|
| 7. Carbon Loss in Pulverised Coal Fired Boilers
<i>S. Rajaram</i> | C 3 69-76 |
|--|-----------|

- | | |
|--|-----------|
| 8. The Effect of Blast Saturation Temperature on the Performance
of Fixed Bed Producer Gas Generators
<i>K. Nandakumar</i> | C 3 77-92 |
|--|-----------|

- | | |
|---|-----------|
| 9. Combustion Aspects of M.H.D. Power Generation
<i>D. Kannappan</i> | C 3 93-97 |
|---|-----------|

PROPELLANT COMBUSTION

- | | |
|--|---------|
| 1. Studies on the Analysis of Intermediates Formed During the
Decomposition and Combustion of Composite Solid Propellant
<i>V. Gayathri, K. Kishore and V. R. Pai Vernekar</i> | C 4 1-5 |
|--|---------|

- | | |
|---|----------|
| 2. Mechanism of Ballistic, Thermal and Chemical Changes
During the Ageing of Composite Solid Propellant
<i>G. Prasad, K. Kishore and V. R. Pai Vernekar</i> | C 4 7-14 |
|---|----------|

- | | |
|---|-----------|
| 3. Effect of Transition Metal Oxides on the Decomposition and
Combustion of Composite Solid Propellants
<i>M. R. Sunitha, K. Kishore and V. R. Pai Vernekar</i> | C 4 15-22 |
|---|-----------|

- | | |
|--|-----------|
| 4. Thermal Decomposition Studies of Some Solid Composite
Propellants
<i>V. K. Rajalekshmi, V. R. Pai Vernekar and S. R. Jain</i> | C 4 23-28 |
|--|-----------|

- | | |
|--|-----------|
| 5. Ignition Characteristics of P.V.C. Ammonium Perchlorate Solid
Propellant
<i>K. A. Bhaskaran and R. Ramaprabhu</i> | C 4 29-38 |
|--|-----------|

- | | |
|--|-----------|
| 6. Effect of Ammonium Perchlorate Particle Size on the Ignition
Delay of End Mounted Propellant
<i>R. Ramaprabhu and K. A. Bhaskaran</i> | C 4 39-44 |
|--|-----------|

vii
