CONTENTS

<i>XVII National Conference on I.C. Engines and Combustion December 18-20, 2001.</i>	v
<i>KREC Sorathkal, Karnataka</i>	vi
<i>Combustion Institute (Indian Section)</i>	vii
<i>Editorial Committee</i>	viii
<i>National Advisory Committee</i>	ix
<i>Preface</i>	x
1. Key Note Lectures	1
<i>Combustion technology for homogeneous charge compression ignition engine</i> N Iida and Y Yamazaki	3
<i>Combustion on solid waste fuels in high temperature environments</i> Saneshi Okajima	15
<i>Optimization of emissions from fluidized bed combustion of coal, biofuel and waste</i> Bo Leckner	21
2. Invited Lectures	29
<i>Technological and safety issues of emerging fuels</i> B S Morthy	31
<i>Biomass potential for energy cogeneration and production of ethanol as an alternate vehicular fuel—an overview</i> F G Kadoli	37
<i>Electronic diesel control system for modern diesel engine and vehicle</i> L M Naik	47
<i>Vehicle emission control—Achievements and challenges</i> R F Pundir	57
<i>Spray studies in the context of liquid bipropellant rockets</i> B N Raghunathan	69
<i>Gas turbine combustion system</i> T K Sampathkumaran	75
<i>Numerical modelling of gas turbine combustion system using CFD—An overview</i> V Ganese	85
<i>Energy and energy balance in the process of spray combustion in a gas turbine combustor</i> S K Som and N Y Shamea	95
<i>Liquid propellant rockets—Current trends</i> K Rameshwarthi	111
3. Alternative Fuels	121
<i>A study on performance of CNG fuelled vehicles</i> S N Yadava and V G Nair	123
xi	
<i>Experimental investigations on a CNG operated two-stroke spark ignition engine</i> M Marouf Wars and M K Gajendra Babu	131
<i>Assessment of the performance & emission characteristics of a CNG operated spark ignition engine</i> D S Maneeesh, T S Bhatti and M K Gajendra Babu	135
<i>Effect of injection timing, EGR and pilot fuel quantity on the performance characteristics of a LPG-diesel dual fuel engine</i> B R Nayak and P Mohanan	141
<i>Effect of injection timing, EGR and pilot fuel quantity on C-b-C fluctuations in a single cylinder LPG-Diesel dual-fuel engine</i> H A Kumar and P Mohanan	149
<i>Investigation on C-b-C fluctuation in diesel engine working on dual fuel with LPG (liquefied petroleum gas) as the secondary fuel</i> B R Srinivas Rao, S Bekal, and B S Somaga	159
<i>On the estimation of power from a diesel engine converted for gas operation—a single analysis</i> S Dasappa	167
<i>Evaluation of physical ignition delay for alternative fuels for diesel engine applications</i> H Yerranna Gouda	175
<i>Critical review on biodiesel as substitute fuel for diesel engines</i> K M Mohan Kumar and I Sarangan	181
<i>Experimental investigations on a CI engine using biodiesels</i> J G Suryawathi and A B Bhoyar	189
<i>Studies on droplet size measurement and engine performance using non-volatile oils as alternate fuels</i> C P Reddy	197
<i>Investigation of rice-bran oil as alternate fuel for diesel engines</i> C R Venkataratnam and V Joseph	205
<i>Utilization of Non-edible vegetable oil in diesel engine</i> G B Reddy, K V Reddy and V Ganesh	211
<i>Use of hydrogen and methanol as primary fuels in a dual fuel engine</i> M Senthil Kumar, A Ramesh and B Nagalingam	215
<i>Effect of water injection on the performance of hydrogen fuelled SI engine</i> R N Gupta and A Gupta	223
<i>BHEL's AFBC boilers—Firing opportunity fuels</i> P K R Parameshwaran, S A Krishnan and S Sundararajan	231
4. Modelling of Engine Processes	239
<i>The combustion model for coal-water mixture in diesel engine</i> M R Nandagopal and B N Sahoo	241
<i>Modelling of spray and in-cylinder air flow interaction in direct injection engines</i> N Ahari and R V Ravikrishna	249
<i>Mathematical modelling of fuel injection system of diesel engine with different cam profiles</i> D K Patra, Y Mehta and H C Dhaliwal	257
xii	
<i>Modelling of two-stroke engine cylinder scavenging flow</i> D Dashmukh and R V Ravikrishna	267
<i>Study of effects of various parameters on the exhaust process of a two stroke engine using mathematical modelling</i> B K Gupta, M V Dehara and H C Dhaliwal	275
5. Emission Control in Engines	285
<i>Testing of a new catalyst for automobile exhaust treatment</i> P Sridharan, R P Viswanath, N Balasubramanian and K V Gopalakrishnan	287
<i>Use of oxygen enriched air in a direct injection diesel engine</i> K A Subramanian and A Ramesh	297
<i>Performance achievements and emission control in DI diesel engine using peroxide based fuel additive with metal catalyst coated pistons</i> K Jayachandran and R Senthil	303
<i>Experimental investigation of diesel catalyst coated ceramic filters for particulate emission control in DI diesel engine</i> K Balagurusamy, V Arumugam and D Ganesh	311
<i>Experimental investigations on a Pd/Rh catalytic converter</i> M Subramanian, J P Subashmanyam and M K Gajendra Babu	319
6. Electronics in Engines	325
<i>Electronic management strategy for fuel injection process in gasoline direct injection engine</i> B Sathish Kumar and P S Mehta	327
<i>Design and development of electronic gaseous fuel injection system for a single cylinder two stroke spark ignition engine</i> S Kumaresan, G P Prabhakumar and B S Samaga	335
<i>An electronic system for controlling air/fuel ratio of gaseous fuelled engine</i> S G Taji, N K S Rajan and G V Parthasarathy	341
7. Two-Stroke Spark Ignition Engines	349
<i>Analysis of emission from two wheelers</i> V Suresh, R Chandan and R S Rathod	351
<i>Some aspects of two stroke petrol engine performance under different configurations</i> N Prabhakaran and C I. Dhamejani	357
<i>Development of a durable emission control system for an automotive two stroke engine</i> P Thirupathi and S Jaichander	363
<i>Experimental study on electronic injected two stroke SI Engine for the performance comparison and cyclic variation of cylinder pressure</i> R Manivel and S Dhandapani	371
8. Engine Performances and Systems	379
<i>Running-in time in reciprocating internal combustion engines—A review</i> N Prabhakaran and C I. Dhamejani	381
xiii	
<i>Reduction of oil consumption for meeting with BS II emission regulations for a DI diesel engine</i> R P Sharma, A Bhobla and R Verma	389
<i>Heat transfer characteristics of a compression ignition engine</i> P Ravi Kumar and J E B Nelson	397
<i>Study of heat transfer process and determination of thermal stresses at nodal points of diesel engine piston</i> N K Samra and P S Dash	405
<i>Simulation and experimental studies of a semi-adiabatic diesel engine</i> R Udayakumar and S Sandarum	413
<i>Experimental investigation on semi-adiabatic diesel engine performance</i> A N Pawar and B N Jajoo	421
<i>Critical evaluation of crankcase ventilation system design for modern high speed gasoline engine</i> V A Kale, N K Jain and R Sarin	431
<i>Experimental investigations on a dual plug spark ignition engine</i> M M Goyal, A A Lacey, L M Das and M K Gajendra Babu	439
9. Fundamental Combustion	447
<i>Introduction of combustion technique using microgravity environment in Japan</i> T Sakuraga and S Okajima	449
<i>An experimental studies of flammability limits of LPG/Air mixtures</i> D P Mishra and A Rahman	455
<i>Study of combustion in methane—air and methanol—air mixtures in a constant volume spherical vessel</i> P K Bose, S Mitra, R K Chakrabarti, and B B Ghosh	461
<i>Kinetic model of biomass pyrolysis in a fixed bed reactor</i> F G Kadoli, S Rajesh Kumar	469
<i>A numerical study on effects of operating parameters on NOx level in open premixed turbulent flames</i> P Y Jagdale, U S P Shet and I Sundararajan	479
<i>Investigations on high temperature oxidation kinetics of n-hexane</i> N Selvaraj, V B Pal, R Stephen, T Syamial and K Thyagarajan	489
<i>DNS of autoignition in a non premixed medium under 3 dimensional turbulence</i> S Soedhara and K N Lakshminisha	499
<i>Acoustically excited vortex combustion in a dump combustor</i> S Rajesh, S K Chakravarty and R I Sujith	507
10. Gas Turbines	517
<i>Prediction of swirling flow fields in gas turbine combustor</i> P K Pandey, T K Sampathkumaran and M Mani	519
<i>Prediction of combustor exit temperature profiles under different inlet conditions</i> P S Rameshram, T K Sampathkumaran and M Venkateswarlu	527
xiv	
<i>Studies on the combustion system of a gas turbine starter under high altitude</i> R C Panda, P Manjunath and P Arumugam	535
<i>A software for performance analysis of turbofan engines</i> S K Chaitanya and U K Mitta	543
<i>Effect of dilution zone configuration on the combustion limits of an annular aero gas turbine combustor</i> R K Mishra, M N Bhat and T K Sampathkumaran	551
<i>Effect of diffuser geometry on the performance of a semi annular aero gas turbine combustor</i> M N Bhat, R K Mishra, R D Navindgi and T K Sampathkumaran	559
11. Rockets and Jet Engines	567
<i>Modelling of Combustion in Liquid Rocket Engines</i> K V Subbaredy, V Babu, T Sundararajan, and K A Bhaskaran	569
<i>Flow field studies of a supersonic combustor</i> V K Saraswat and S Kumar	579
<i>Experimental investigation on erosion due to impingement of supersonic rocket exhaust</i> G D Mahto, P S Prakash Rao, S C Mishra, G C Pant and V Ramanujachari	589
<i>Numerical simulation of L*-instability and chuffing in solid propellant rocket motors</i> K R Anil Kumar and K N Lakshminisha	595
<i>Performance prediction of an H₂-O₂ based igniter for cryogenic engine</i> M P Aswiz, T Sundararajan, K A Bhaskaran, and K Rameshwarthi	603
12. Poster Papers	615
<i>Design and testing of baffle type catalytic converter on VCR petrol engine</i> M Balasai and C G Saravanan	617
<i>Reduction of diesel engine emission by using urea as a reducing agent and with copper ion exchanged zeolite catalyst</i> P Tamilparai and S Jaichander	619
<i>Reduction of particulate emission using particulate trap in diesel engine</i> K Jayachandran and M Rathinavelu	621
<i>Computer-aided heat release models for direct injection compression ignition engines</i> Udayakumar R, Senthilvel T and Vigneshwaran S	623
<i>Computer simulation of compression ignition engines to predict emissions</i> Udayakumar R, Arvind M, Vijay R and Subashini L	625
<i>Index</i>	627
