CONTENTS	
Organising Committee Combustion Institute (Indian Section) Editorial Committee	iti iv v
National Advisory Committee Preface	ยใ ยใใ
I. Spark Ignition Engines Experimental investigations on an ethanol-gasoline mixture operated	
single cylinder spark ignition engine Latey A.A., Bhatti T.S., Das L.M. and Babu Gajendra M.K.	1
Effect of compression ratio in a two-trooks spark signition engine with electronic direct CNG injection Kumarappa S and Prabhukumar G P	11
Performance evaluation of extended expansion spark ignition engine-numerical and experimental investigation Mallikarjunappa J M and Ganesan V	17
Deselopment and analysis of ethanol blended S I Engine Udyayakumar R, Senthilkumar S and Senthilkumar P	29
Performance and emission prediction for a natural gas and hydrogen fueled spark ignition engine Gupea N H and Rai R	35
Experimental investigations on a methanol-garoline misture operated single cylinder spark ignition engine Latey AA, Bhacti T S, Das I. M and Babu Gajendra M K	43
Mathematical modelling of S I engine with catalytic converter Gupta H N and Kalita P	53
Effect of surbulence chamber configuration on performance of a two-stroke 8 I engine Shafi K.A, Suresh. V and Gopalakrishnan K.V	61
Experimental investigation on semi direct electronic injection in four stroke SI engine by virtual instrumentation Dhandapani S and Robinson Y	67
ix	
Some development and testing aspects of two-stroke single cylinder	
high specific output engine Dhamajani C L, Prabhakaran N and Radhakrishna D Analysis of Spark Ignition engine cycle with variable specific heass and	75
composition Chandra Murthy M S R, Kachroo A K and Sambasiva Rao M	83
II. Compression Ignition Engines	
Electronic diesel control- A strategy for Euro 3 optimization for LCVs and HCVs Vinu H R and Soorajith R	91
The effect of turbulence induced through internal jets on diesel engine performance and smoke emission; Senthilkumar K R, Gopalakrishnan K V and Mehta P S	97
Experimental investigations on combustion and emission characteristics of a compression ignition engine with oxygenated fuel additive Venkatachalam R, Nedunchezhian N, Vadivel R and Dhandapani S	
Experimental inventigation of fuel spray impingement against the tip on the performance of direct lengths. Jajoo B N, Deshmukh M M, Kajalkar P M and Thakur V D	105
On the operation of a small stationary Diesel Engine with mixed metal. DeNOx Catalyss	109 oxide
Balasubramanian K and Devan P K	113
III. Engine Design and Development The intricacies of engine design and development Mutalidhar Rao N	
Dynamic response analysis of a value train using FFT and impact theory for value bounce with experimental validation Ramadasi S S and Marathe N V	119
Ramadasi S S and Marathe N V Investigation of the effect of various parameters on the design of a PID governor for a diesel engine	125
Malkhede D N, Dhariwal H C and Joshi M C Improvement of engine cooling system efficiency of a tracked vehicle Sathyanarayanan P L and Ramprabhu R	133
Sathyanarayanan P L and Ramprabhu R Optimization of cooling system for a high specific output ingine Kumarasamy A and Sivanandham M	141
Development of diesel particulate filter for diesel engine Deshpande NV and Kongre S C x	155
IV - Engine Emission and Control	
NOx Control in burners - Invited Lecture Shee U S P	165
Reduction in smoke density in compression ignition engines using diesel oxygenate blends as fuel	
Zodpe D B and Deshpande N V Exhaus gas revisculation and ethanol operation for engine emission con Ashok Kumar S K, Jinu O, Veigas W R and Naik R	177 trol 183
Emission reduction in four-strake SI engine using EGR and eatalysic ca. Aravinthan M, Sathyagnanam A P, Sivaprakasam S, Shanmugayadiy	nvertor el T
and Saravanan C Studies on the effect of Cu-ZSM5 on the control of SI engine exhaust en Pattanaik B P, Choudhry Debasish Roy, Chakrabari R K,	189 nission
Bose P K and Ghosh B B A study of different methods of exhaust after treatment for emission	195
control in a two stroke S I engine K S Sarach kumar, M Loganathan, R P Viswanath, A Ramesh and B Nagalingam	201
V. Engine Simulation and CFD	
Predictions of combussion chamber geometry effects in direct injection diesel engine-Invited Lecture Mehta P S	211
A numerical study on S I engine air intake system Sucesh Kumar J and Ganesan V	225
Numerical modeling of staged transverse injection behind a rearward-facing step Deepu M, Jayaraj S and Ramachandran G	233
Development of four zone combustion model for the prediction of diesel engine pollutarits Devarudjane G	
Devaradjane G Evaluating the effect of pisson cavity on In-cylinder flow in direct injection diesel engine using CFD technique	241
Jaspal N, Desai M. M, Jayanti S and Mehta P S Fuel Spray-Air interaction in a GDI engine: effect of turbulent droplet	251
dispersion Anand T.N.C, Abani N and Ravikrishna R.V	259
*	
A multi-block moving mesh algorithm for modeling of flow through p. Controlled Ports Bakshi S and Raviktishna R V	iston- 267
Multidimensional modeling of the scavenging flow in a loop-scavenged two-stroke engine	277
Bakshi S and Ravikrishna R V Numerical simulation of the two-phase gas-tolid flow in a cyclone separator-Application in air filtration for IC engines	
Madhusudhan K, Vikram G, Narasimhan M V, and Ravikrishna F Numerical simulation of three dimensional turbulent nozele flow win	
higher order element free technique Ranjithkumar S, Kishorkumar V V and Bhanu W Comparison of two turbulence models for an interaction manager of	291
Comparison of two turbulence models for an interactive supersonic flo Rony C Varghese, Ramachandran G and Jayachandran T	297
VI. Combustion in Propulsion Syste	
Stability of non-premixed jet flames in presence of cavity tones-Invited K Ramamurthi and S R Parnaik	Lecture 307
Preliminary flight rating test of an aero gas turbine combustor Mishra R K and Bhat M N Effect of inlet conditions on the performance of aircraft afterburners	315
Rajkumar M and Ganesan V Numerical simulations of transverse injection of gaseous hydrogen	321
into supersonic crossflosu Srivam AT and Mathew Joseph Experimental study of axisymmetric cavity flame holders for supersoni	329
combustor Jeyakumar S, Balachandran P, Thillai Arasu P, Dhanaraj R and Rajaram S	
Experimental investigation on flame spread of nitramine based solid propellant with sudden expansion port	335
Kapahi S, Krishna V, Roy R D and Ramanujachari V Numerical simulation of Superionic Viscous flow over Reentry Captu Sathcesh Chandran V, Z A Samitha and R C Mehca	. 339 4.
Sauteen Chandran v, 2 A Samitha and R C Meng	345
VII. Premixed Flames An experimental determination of stability limits of CNG-air premix	ed flame
Mishra D P Emission studies of impinging premixed flames Mishra D P	355
Oscillatory combustion response of a lean laminar premixed flame Kartheekeyan S and Chaktavarthy S R	371
A study on the structure of open premixed turbulent flames Ramachandran G and Shet USP	379
Temperature measuremens in a partially premixed co-flowing jet flame using coherent anti-Stokes Raman spectroscopy Datta A, Beyrau F, Seeger T and Leipertz A	389
Studies on hydrogen jet flames in a co-flow air stream Hemanth Kumar S and Shet U S P	397
Experimental comparison between dissel and bio-derived fuel sprays Suryawanshi J G and Deshpande N V $$	405
Stability of partially premixed laminar flames in cross flow R Kalyan Raja and U S P Shet	413
VIII. Droplet and Spray Processe	s .
An efficient droplet evaporation model for simulation of spray combu Mukhopadhyay A and Sanyal D	ution 423
A theoretical analysis of transient droples combustion with droples he Alam S S, Ashtisham A N and Tariq A	ating 431
Investigation of changes in the flames shapes during droplet burning convective environment Raghavan V, Babu V and Sundaranjan T	in . 441
IX. Special Topics in Combustion Development and validation of integrated fire modeling methodology	
Development and validation of integrated fire modeling meshodolog ventilation design and hazard assessment in large building - Invited Kumar S, Chitty R and Welch S	y for smoke Lecture 449
xill	
Modelling of emissions of nitrogen oxides from circulasing fluidised by Combustion-Invited Lecture	
Bo Leckner, Pia Kilpinen Analytical investigations on ignition of propane-butane mixtures	463 469
Selvataj N and Thyagarajan K Numerical prediction of NOx in a co-swirl burner Rao Rama N, Shet U S P and Sundararajan T	469
Experimental investigation on combustion stability of tolid waste fue high temperature and low oxygen environments Masashi Watanabe, Akiko Okajima, Yoichi Ishizaka and Satoshi G	ls in
Fundamental Characteristics on Waste Fuel Combustion in High Temperature Atmosphere	
Yasuhiro Takayama, Yusuke TanaamI, Akiko OkajimA and Satosi	
Experimental study on waste fuel combustion in high temperature as	
Experimental study on waste fuel combustion in high temperature at low exogen exhaust gut Akiko Okajima, Makoto Yamazak, Takashi Sakuraya 1 Kazmiyata, Mitsuhiro Sakamoto, Tusuzuru Nuibe and Satoshi Okajima	od .
Experimental study on southe fuel combustion in high temperature at low engren echanis gu Akiko (Valjima, Makoro Yamarak, Takashi Sakunya) Kazmiyata, Misushiro Sakamoo, Tususum Vuibe and Satoshi (Dajima Development of A Notatel Mit. Type Industrial Gas Burner H K Makala and U K Jainval	501 507
Experimental study on waste fuel combustion in high temperature at low cogger exhaust get Akiko Okajima, Makoto Yamazak, Takashi Sakusayai Kazmiyata, Mitsuhiro Sakamoto, Tustusuru Nuibe and Satoshi Okajima Development of a Nestek Mic Tipe Industrial Gas Burner	501 507
Experimental study on usate ful combustion in high temperature as low orgon cochast pst Akido Okajima, Makoto Yamanak Taksahi Sakunyai Kazmiyai Misushiro Sakamono, Tasusura Nukie and Stooth Okajima Development of a Nuszle Mise Type Industrial Gas Burner H K Madan and U K Jaiwal Ignition delog Pilusuno Coygon-Argon Miseures in reflected shocks	501 507
Experimental study on usate ful combustion in high temperature year low orgon cochast pst Aktho Okajima, Mahoto Yamanak Tiskashi Sakusayai Kazaiyai Akishiro Sakamono Tistusum Nukis and Stooth Okajima Development of a Nueszle Mise Type Industrial Gas Burner H K Madan and U K Jaiwal Ignition delay of Busane-Oxygon-Argon Miserures in reflected shocks Selvaraj N, Syamlal T and Thyngarajan K X. Alternative Fuels Finits for heavy duty sehicles: emission standards and future world-Initial Lecture	501 507 507 513
Experimental study on usate ful combustion in high temperature as low orgen cohests ps Akiko Okajima, Makoto Yamasak-Taksahi Sakusaya! Kazaniyasa, Misushiro Sakamono Itsusuru Nukie and Sasoth! Okajima Development of a Neazle hike Tipe Industrial Gas Burner II K Madan and U K Jaiwal Ignition delay of Busane-Oxygon-Argon Miseures in reflected strocks Schozzi N, Syunlal T and Thysgarajan K X. Aleernative Fuels Fuels for heavy duty vehicles: emission standards and future trends- Invited Leeture Pundit B P Thermochemical and Electrochemical convention for Automobile	501 507 508 513
